DEATH OF A VETERAN.—With the opening of a New Year, one of our oldest citizens has been "gathered to his fathers" after a long life of 33 years, the greater part of which was devoted to the public Major Benj. Russel is no more! He died this morning venerable by age, yet 'strong and lusty' in his looks and feelings, universally known and everywhere respected.—Boston Transcript, Jan 4.

The increase has been in ashes, becf, candles, cheese, coffee, grein, cotton, fish, flour, lard, naval stores, pork, wheat, teas, superfine silks and sugars—nearly all of the agricultural products—while the falling off has been confined principally to butter, cassis, cocca, hides, cil, and tobacco. The export trade of this port throughout the year 1844, was rather more favorable than 1843, so far as quantity of merchandize shipped is concerned, but we are inclined to think that it has not been so profitable to those engaged, as the trade of it he year previous.— Prices for all our principal agricultural products the past year have ruled very low, much lower than for many years previous. Producers have hardly realized remunerating rates for their crops, and the aggregate value of merchandize sent abroad in 1844, will not probably exceed that for 1843. Every thing has been very abundant. Our surplus supplies of breadstuffs, provisions, cotton, &c., have been beyond the control of speculators and all monopolizers. This has been of great advantage to the consumers, but there the benefits stopped. The planters of the South and the farmers of the West have not realized the returns an ticipated, and find themselves oramped in their resources. The cultivators of the soil generally make their calculations and arrangements one year in advance. The profits of their crops are estimated, and in their expenditures they govern themselves accordingly. Any disappoint ment or derangement in their anticipations restricts the irreceipts, and prevents them from meeting their liabilities at maturity. This, in turn, affects the merchants in the evit rapidly spreads through the commercial classes and creates serious embarrassments—all springing from the difficulties the reduced value of produce entail upon the creates serious embarrassments—all springing from the difficulties the reduced value of produce entail upon the

incressed \$544,400, and the resources have increased the same amount. The circulation has increased \$2,963,891, while the specie has fallen off \$2,711,676, making a difference of \$5,670,567 in these departments within the year. How it is that there should have been an increase in circulation of nearly three millions and a decrease in the specie of nearly the same amount, in the year, is more than we can fathom, but it certainly looks very strange. This movement depreciates the currency very much. If the additional issues have been made to fill the vacuum caused by the drain of specie, and to keep the circulating medium regular, it was a very dangerous operation, and unless the specie is soon returned, or a large amount of paper withdrawn from circulation, the consequences may be more ruinous than anticipated.

The Message of Governor Briggs to the Legislature of Massachusetts has the merit of brevity. It alludes to the finances of the State, but the document is principally devoted to remarks in relation to the annexation of Texas. The receipts and expenditures of the State Treasury for the past year, were as annexed:—!

A sinking fund to redeem the Western Railroad sorip is established, to consist of the profits on the sale of the sorip, and after the road is opened for use, one per geent per annum on the amount of scrip leaned.

Forty-six thousand five hundred and fifty dollars of the public debt falls due in 1846, after which nothing comes due until 1857. The debt of \$1,000,000 incurred to pay the State's subscription to the Western Railroad, falls due in \$5,049 555 56

Baltimore Cattle Market.

The offerings of Seef Cattle continue large for the sear on of the year, and owing to the fact that there was no demand from the packers, the market was less active this week than at any previous period for some time past—Prices have however declined but little. On Monday there were 600 head offered at the scales, of which 170 were driven North and 380 sold to the city butchers.—The prices paid ranged from \$1.50 for interior to \$2.75 per 100 lbs. for prime quality an the hoof, equal to \$3.25 25 net. Yesterday, 30 head of those left over at the commence ont of the week, were sold at about the rates named above. leaving 120 still unsold. Live Hogs have come in sparingly this week, and sales have been made in small pircels only at \$4.25, at which rate they are now held. There is a good supply of killed hog: now offering, and sales are making at \$5.71 a \$4 per 100 lbs. for those of large size, and at \$4.12 a \$4.50 for small.
